EDUCATION

Zhejiang University (ZJU), Hangzhou, China   Aug 2017-Present
B.S. in Information Engineering (expected in June 2021)
- Overall GPA: **3.90/4.00**
- Rank: **13/146** in the Information Engineering Department, College of Information Science & Electronic Engineering
- Member of the Chu Kochen Honors College (Minor in Advanced Honor Class of Engineering Education)
- 7 years of programming experience in C, Python, Go and MATLAB

RESEARCH EXPERIENCE

Institute for Data Engineering and Science | Georgia Institute of Technology | Remote | Research Assistant
Advisor: Prof. Chao Zhang
Bert and Self-training Assisted Event Extraction with Distant Supervision   Jul 2020-Oct 2020
- Improved recall by fine-tuning the RoBERTa model on distantly-matched labels generated from open-domain corpora by Snorkel with defined rules and key words
- Devised a self-training scheme to tackle with the noisy label problem and further improved the recall.

Institute of Multisource Perception and Machine Intelligence | Zhejiang University | Research Assistant
Advisor: Prof. Chunguang Li
Semi-Supervised Ordinal Regression for Image Ranking   Jan 2021-Present
- Conducted extensive research on optimization problem design of ordinal regression mode with semi-supervised learning.

Asymmetry Deep Double-bit Hash Learning for Image Retrieval   Apr 2019-Apr 2020
- Proposed an end-to-end deep model asymmetrically learns compact and efficient hash code for cases with large-scale database, the MAP result increase from 87.84 to 90.04 on NUS-WIDE.
- Devised the formulation of hashing problem with bits balance and uncorrelation constraints, using double-bit quantization strategy.
- Presented a novel strategy transforming the discrete optimization problem in learning binary code into a continuous one without relaxations and improved the performance of the model.
- Deployed the model via a REST API with flask.

HONORS AND AWARDS

Provincial Government Scholarship (21 out of 146)	2020
Second-Class Scholarship for Outstanding Merits, Zhejiang University (top 8% at ZJU)	2020
Third-Class Scholarship for Outstanding Merits, Zhejiang University (top 15% at ZJU)	2019
National Scholarship (Official Honor of the Highest Level, 2 out of 146)	2018
First-Class Scholarship for Outstanding Merits, Zhejiang University (top 3% at ZJU)	2018
Academic Excellence Awards (top15% at ZJU)	2018, 2019, 2020
Outstanding Volunteer (7 out of 311)	2020

SELECTED COURSE PROJECTS

A Intelligent Home Temperature and Humidity Detection System   Feb 2019 – Jun 2019
Course: ***IoT System Design*** | Zhejiang University | Project Leader
- Front-end web development was based on UmiJS+Ant Design+dva, presenting the current temperature and humidity detected by the hardware terminal
- Back-end development was based on MySQL+MyBatis-Spring. data was retrieved from the Aliyun Cloud
- Embedded programming was based on AIoT-KIT, sending the detected data to the cloud

SKILLS AND OTHERS

Languages: Mandarin (native); English (fluent), TOEFL: 99/120
Computer Skills: Experienced in PyTorch, OpenCV, Docker
